

## We supply results

### About Acandia

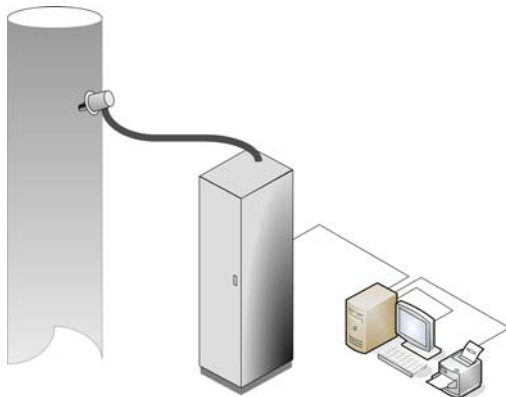

Acandia AB was founded in July 1989 and was originally involved in the planning and installation of cable TV networks. Already then we were specialised in custom made solutions.

Lately project management has been a growing part of our business. We have taken part in and are continuously engaged in larger purchase projects and in many of the large projects building telecommunication and broadband networks.

In early 2005 we started a successful venture to offer products, system solutions and services within the field of gas analysis and other instrumentation. The business area is constantly growing and we increase our cooperation with a growing number of partners as well as recruit personnel to meet the growing demand.

Today Acandia offers products and services within gas analysis, instrumentation & data acquisition as well as consultancy services.

Our office is located in Tyresö just outside Stockholm and from there we are ready to support customers in Sweden and Scandinavia.

### Gas analysis

We offer complete system solutions, analysers and accessories for analysis of most gases and applications.

Our systems are always developed to meet our customers needs:

- We have more than 20 years experience from design, project management and production of hundreds of custom made analysis systems.
- We are independent and choose components based on the demands of our customers.
- We offer solutions for: Environmental monitoring, CEMS: Continuous Emission Monitoring, THC-analysis, leak detection R134a, H2S-analysis, mobile applications, impurities in clean gases, engine and vehicle testing, etc.
- We cooperate with partners and suppliers who share our values. The customer comes first!
- We supply complete solutions including data acquisition and control system, commissioning and training as well as complete documentation.
- We also offer analysers, gas conditioning components and calibration gases.
- We offer service as well as spare parts.

## Instruments and data acquisition

### We offer:

#### Transmitters and sensors

We offer intelligent transmitters and sensors for online measurement of temperature, pressure, flow and moisture in ambient air as well as in industrial processes.

#### Data acquisition and logging

Dataloggers including software for various applications:

- 1-16 channel loggers that can be equipped with a wide variety of input modules for laboratories, measuring consultants or system integration.
- Small 1-4 channel battery loggers for datalogging of signals from most sensors.
- Small battery loggers with built in sensors for temperature, barometric pressure and/or relative humidity. For monitoring of the conditions during food transport and storage, in museums, green houses, etc.
- Handheld instruments and loggers for measurement of temperature, barometric pressure and/or relative humidity.

## Consultancy services

### Resources

Acandia offers resources to project organisations ranging from individuals up to manning part of or complete project organisations. We have experience from planning, investigations, analysis, documentation, purchasing, as well as assignments where we have had overall responsibility for a project.

### Competence

Through the competence of our staff and our partners we are able to offer help within the following areas:

- Project management
- Telecommunication
- Supervision
- Purchasing
- Business development
- Quality management
- Environmental management
- System integration
- Gas analysis
- Environmental reporting
- Etc.

## Customers

### Some of the companies that has chosen us as a supplier:

ACB Laminat AB, Banverket (Swedish Rail Administration), E.ON Värme AB, Ericsson Sverige, Fortum, Hi3g, ILEMA Miljöanalys, Kramfors Fjärrvärme AB, Ljusdal Energi AB, Orange Sverige, Sandvik AB, SSAB Oxelösund, Stjärn TV, Stockholms Universitet, Söderhamn Energi AB, Telenor, Telenor Cinclus, Telge Nät AB, Teracom, Veolia Transport Sverige AB, Åre Fjärrvärme AB / Jämtkraft AB
